## COMPANY PHILOSOPHY

Since its inception, **HazMat Training** management personnel have had one common goal. That goal is to provide the highest quality “hands-on” worker safety training that meets the compliance mandates handed down by various regulatory agencies including OSHA, DOT, and EPA.

Through hard work, determination and provision of state-of-the-art equipment and facilities **HazMat Training** continues to meet the needs of our clients nationwide. **HazMat Training** is a true leader in regulatory compliance training. We provide the best instructors, facilities and equipment to meet our customer’s most demanding standards.

According to the **National Institute of Environmental Health Sciences**, performance and learning objectives are most successfully accomplished by doing.

All **HazMat Training** programs are competency and performance based. This means that students are tested through either written examinations or by actually performing tasks. Using this technique of competency evaluation, students can be ensured of understanding the training material covered. **HazMat Training** will develop and implement new training programs or customize existing programs to meet your needs. Training can be held at your facility or ours. Talk with us about your special needs, and let us show you what we can do to help.

The staff at **HazMat Training** stands ready to assist you by providing technical support or training on a wide range of environmental, safety, health and engineering issues. Whether you need compliance evaluations, new or improved procedures or checklists, performance evaluations, regulatory documentation, awareness seminars, or in-depth training programs, we are here to assist you, our customer.

---

## INSTRUCTOR QUALIFICATIONS

**HazMat Training’s** trainers must have satisfactorily completed appropriate courses for teaching the subjects or have the academic credentials **and** the experience necessary to demonstrate sound instructional skills and knowledge of the subject matter.

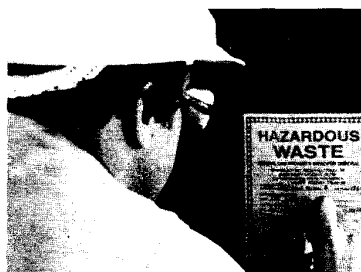

Trainers are selected on the basis of professional background and expertise in the subject matter.

Qualifications are determined by a combination of academic degrees, training courses completed, work experiences and credentials demonstrating competency as a trainer.

**HazMat Training** has a number of adjunct instructors available which hold certification and degrees in various specialty areas. Should your firm require instructors with specific background and/or certification skills, **HazMat Training** can meet your needs.

## CURRENT COURSE OFFERINGS

**HazMat Training's** courses are designed to meet or exceed all applicable State and Federal regulations. The selected course will provide participants with the knowledge and skills necessary to safely perform operations involving hazardous materials and conditions. Training includes lectures, demonstrations, hands-on exercises and course review. Any job specific training with equipment will be under the direction of our trained experienced staff. **HazMat Training** will develop and implement new training programs or customize existing training programs to fit your needs.
